Assessment ~ Design & Implementation ~ Managed Services

Security Services

A SERVICE OF LATTIMORE BLACK MORGAN & CAIN, PC

LBMC provides a full array of information security services designed to help protect your most valuable assets – your employees, your clients and your information.

By utilizing a security services organization, companies have the confidence that they are safeguarding themselves against potentially embarrassing and costly problems. Whether your business already has an information security process in place or you are working toward securing your program environment, LBMC can assist you.

Security Services Offerings:

Assessment Services

LBMC Assessment Services helps you determine how well your organizations' security and security policies protect your assets. Through a variety of testing methods, we can help you define, and protect your information from real-world attacks. Whether your needs are for compliance, reduction of business risk, due diligence testing or you suspect a possible weakness in your controls, we offer a full suite of assessment services to meet your needs.

- Information Security Risk Assessments
- Attack and Penetration Testing
- Vulnerability Assessments
- Web Application Testing
- Security Incident Assessments and Forensics
- Database Security Testing
- Physical Security Testing
- Regulation Compliance Testing (SOX, HIPAA, GLB, CMS, FISMA)
- PCI Compliance Assessments

Design and Implementation Services

LBMC Design and Implementation Services provide an organization with the needs assessment, planning, development and implementation of an information security program. From policy and procedure development to full implementation of your security program, we work with you to help ensure the protection of your business assets. Having developed programs ranging from retail to financial institutions to large publicly traded and international organizations as well as others, LBMC has a proven track record of knowledge and experience.
