LBMC’s Post-Acute Care Consulting Team of experts assist with the coordination of care among ambulatory, acute and post-acute care (PAC) providers from an operational perspective. We work with providers to effectively respond to strategic, regulatory and reimbursement challenges as well as with hospitals to develop post-acute care network strategies and focus on more coordinated less-costly continuum of care.

The LBMC Difference

The LBMC team of experts has served in healthcare leadership roles ranging from Chief Executive Officer, Chief Financial Officer, Chief Operating Officer as well as other integral roles such as Chief Compliance Officer and Managed-Care Executive.

This expertise enables our LBMC experts to understand the major operational challenges of all healthcare post-acute providers bringing practical expertise to improve operational performance and boost the bottom-line.

Education

1. As reimbursement challenges continue to rise amid the increasing financial constraints imposed by recurring cuts to Medicare and Medicaid, providers must develop new fiscally strong strategies to preserve and increase revenue. Regardless of the downward pressure on revenue, the patients need and must receive high quality care.

2. Coordination of care among ambulatory, acute and post-acute care providers is critical. Effective strategies begin with managing care prior to an acute episode and collaborating with all providers and the patient throughout the continuum to ensure safe transition back into the community.

3. LBMC’s Care Continuum Coordination model provides the framework for physicians, acute care hospitals and post-acute
care providers to achieve the highest quality patient care.

**Who could benefit from a PAC strategy opportunity?**
1. Medical care providers including physicians and non-physician providers
2. Hospitals
3. Post-acute care providers including long-term hospitals (LTCHs), inpatient rehabilitation facilities (IRFs), skilled nursing facilities (SNFs) and home health agencies

**Advantages to working with LBMC on PAC strategy**
1. Better management of patients throughout the healthcare continuum
2. Controlling costs under bundled payment and value-based payment models
3. Improving patient quality
4. Additional revenue streams
5. Increased reimbursement

**Physician Post-Acute Care Consulting Services**
1. Identify Physician Opportunities in Post-Acute Care
2. Coding and Billing Education
3. Utilization of Non-Physician Providers
4. Compliance Program Development and Implementation
5. Revenue Cycle Management
6. HIPAA Privacy and Security Audits
7. Practice and Billing Assessments
8. Provider Enrollment and Credentialing
9. Practice Management Consulting
10. Electronic Medical Record Vendor Review, Selection, and Implementation

Hospital Post-Acute Care Consulting Services
1. Post-Acute Care Strategy Development
2. Bundled Payment Program Evaluation
3. Post-Acute Care Partner Evaluation
4. Discharge Planning Analysis
5. CJR Collaborator Agreement Review
6. Episode-Based Post-Acute Care Contracts
7. Cost Report Review and Preparation
8. Co-management and JV Arrangement Development
9. Income Guarantee Monthly Computation Services
10. Community Health and Physician Needs Assessments

Post-Acute Care Provider Consulting Services
1. Value-Based Purchasing Strategy Development
2. Final Rule and IMPACT Act Compliance
3. SNFist Program Implementation
4. Antibiotic Stewardship Program Development
5. Hospital Readmission Protocol Implementation
6. Quality Measures and 5 Star Rating Improvement
7. Revenue Cycle Management
8. Cost Report Review and Preparation
9. Creation of Community Specific Care Management Programs
10. HIPAA Compliance/HIM/IT Security
11. LTPAC Software Selection, Implementation and Management
